Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 8-16-00 was in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

Drawings

The drawings are objected to because they contain text that is in a foreign language. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because lines 5-6 are confusing. In particular, the phrase "calculating device for calculating characteristic a function from these loan amounts" is unclear. Clarification is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

Art Unit: 3624

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The metes and bounds of the invention are not clearly established because neither the specification nor the claims clearly identify what the various "means" are. For example, it is not clear what technology is used for the input means, characteristic function calculating means, probability distribution calculating means, probability distribution output means, etc.). In other words, what computer related mechanism is used as the input means and the calculating means?

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is indefinite because it is unclear what is meant by the phrase "rounding means . . . to a number integer times of a predetermined unit."

Art Unit: 3624

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because they claim a “system” and it is unclear if the Applicant intends the ‘system’ to refer to an apparatus or a method. A statement for the record identifying the Applicants intentions should suffice to overcome this rejection, (i.e. claims 1-5 are directed to an apparatus).

Claims 1-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims lack any reference to specific technology, i.e. a computer and related equipment. The Board of Patent Appeals & Interferences has found that in order to comply with the requirements of 35 U.S.C. 101, the claimed invention must be directed to some form of technology. A claimed invention that does not claim some form of technology is “nothing more than [an] abstract idea which is not tied to any technological art and is not a useful art as contemplated by the Constitution.” *Ex parte Bowman*, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) (Unpublished).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Dembo patent is for a method and apparatus for optimally allocating available resources. The Atkins patents (three) disclose systems for personal financial management. The DeTore et al. patent is directed to an automated system for use in decision making. The Gould

Art Unit: 3624

et al. patent is for a computer system for managing the allocation of mortgage pool risks. The Halbrook patent is directed to a financial management data processing system.
